

**Amelanchier alnifolia***Saskatoon Serviceberry* (Code: 8240)

This native North American deciduous shrub features an abundance of white flowers in spring, turning to small edible fruits that taste something like a blueberry. The leaves turn crimson-red in fall. Wonderful for attracting wildlife! (1½-2' x 12-20' x 8-12') Zn3.

**Arctostaphylos uva-ursi 'Massachusetts'***Kinnikinnick, Bearberry* (Code: 5674)

This popular native evergreen groundcover is very cold and drought tolerant. Small pink flowers bloom in early spring and are followed by bright red berries in fall. (4" x 36-72") Zn3.

**Arctostaphylos uva-ursi 'Vancouver Jade'***Kinnikinnick* (Code: 6383)

Small pink flowers in spring turn into scarlet-red fruit in summer and fall. This drought tolerant, glossy-leaved, evergreen groundcover is deservedly popular. (4" x 36-72") Zn3.

**Artemesia ludoviciana 'Valerie Finnis'***Wormwood* (Code: 2166)

Broad, jagged silvery-white foliage provides a foil for bright or dark colored companion plants in the border. Native to the Pacific Northwest. (30" x 30") Zn5.

**Aruncus dioicus***Goatsbeard* (Code: 2171)

The large billowing white plumes that appear in summer resemble an oversized astilbe. It makes a bold and stunning shade accent! Circumboreal to North America, Europe and Asia. (6' x 4') Zn4.

**Asarum caudatum***Wild Ginger* (Code: 5167)

Northwest native perennial with evergreen heart-shaped leaves that slowly grow to form a groundcover. It grows best in moist, but well drained soils in open woodlands. (4-5" x 18-24") Zn4.

**Blechnum spicant***Deer Fern* (Code: 7488)

This NW native, tufted fern has compact, symmetrical, lustrous evergreen fronds. A "Great Plant Pick" for the Pacific Northwest, it is an essential ingredient for the natural woodland garden, as either an accent plant or groundcover. (16" x 24") Zn5.

**Calocedrus decurrens***Incense Cedar* (Code: 7272)

This 'NW native conifer has a narrow conical shape with reddish brown bark. The scale-like, fragrant, evergreen leaves form flat sprays and carry cinnamon colored seed cones. It is excellent when used for tall hedges. (50' x 10') Zn5.

**Camassia quamash***Camas* (Code: 6352)

Loose clusters of star-like, deep blue blossoms are carried on 1-2 ft. spikes from late spring through early summer. Grass-like basal leaves go dormant in summer after flowering. Native to NW marshes and moist meadows. (20-24" x 12-16") Zn4.

**Carex subfuscata***Rusty Sedge* (Code: 7419)

This native western US sedge is found everywhere from the sea to the desert. Low growing with narrow, upright, dark green leaves, it spreads to form a low maintenance lawn or groundcover. Easy to grow in almost any situation. (4-10" x 18-36") Zn5.

**Carex tumulicola***Berkeley Sedge* (Code: 6823)

Very narrow bright green blades form evergreen clumps. Use as a groundcover under trees or in moist areas. It reseeds readily. Native to the Pacific Northwest. (12" x 18") Zn7.

**Cornus sericea 'Hedgerow's Gold'***Redosier Dogwood* (Code: 6858)

Bright golden-yellow and green-variegated leaves contrast vividly against deep red stems. Eye-catching every season of the year. This Northwest native cultivar is a "Great Plant Pick" for the Pacific Northwest! (4-10' x 5') Zn4.

**Deschampsia caespitosa***Tufted Hair Grass* (Code: 5161)

Attractive arching green blades are topped with large, pendulous panicles which turn from green to yellow through the season. It grows best when temperatures are moderate. (2-4' x 3') Zn4.

**Dicentra formosa 'Adrian Bloom'***Western Bleeding Heart* (Code: 4544)

One of the best blue-green dicentras, with fern-like foliage. It has contrasting crimson-red flowers strung on short stalks. A sweet accent for the shade garden. (12" x 8-12") Zn3.

Erigeron glaucus
Beach Aster (Code: 2610)

Small, lavender-rose, fringed daisies shine over a compact, dark-green mound. This NW native thrives in coastal conditions! (6" x 12") Zn6.

Eriogonum umbellatum ssp. polyanthum var. subalpinum
Sulfur Flower, Buckwheat (Code: 5918)

Umbels of yellow flowers age to orange-red and persist for weeks in late spring and early summer. The gray-green spoon-shaped leaves form a low mound. Requires gravelly soil. This species is found in the mountains of Southern Oregon and Northern California. (8-12" x 15-24") Zn3.

Fragaria chiloensis
Beach Strawberry (Code: 5005)

This NW native, glossy-leaved, prostrate strawberry makes an excellent evergreen groundcover that is tolerant of many different conditions. Simple white flowers in spring are followed by edible red berries. (4" x 24") Zn4.

Fragaria vesca
Woodland Strawberry (Code: 7270)

North American native deciduous woodland groundcover with 3 leaflets and white flowers in spring followed by small, sweet strawberries in summer. (2-4" x 18-24") Zn3.

Fragaria virginiana
Virginia Strawberry (Code: 7269)

North American native strawberry with white flowers in late spring and summer. Sweet red berries are about 1.2" across in summer. Often seen in open woods or moist meadows throughout North America. (2-4" x 18-24") Zn3.

Gaultheria procumbens
Wintergreen (Code: 2690)

Elegant, North American native, evergreen groundcover for moist, well-drained, shaded areas. Tiny white bell-shaped flowers in spring produce red berries in fall with the taste of wintergreen. (2-3" x 24") Zn3.

Gaultheria shallon
Salal (Code: 6347)

Pacific Northwest evergreen groundcover or low spreading shrub that tolerates dry shade to full sun. Urn-shaped white flowers appear in spring and produce dark purple edible berries. Salal leaves are often used by florists. (18-30" x 24-36") Zn6.

Holodiscus discolor
Oceanspray (Code: 4433)

This Northwest native deciduous shrub has slender arching branches and fuzzy green leaves. Creamy flowers bloom in drooping panicles 8" long from early to mid-summer. (8-10' x 4-8') Zn5.

Juncus patens
Common Rush (Code: 7832)

Green, graceful knee-high arching foliage with brown flowers then seed heads from May to Nov. Loves wet feet but can tolerate dry to drought conditions once established. Native from WA to CA. (2-3' x 2-3') Zn6.

Lewisia cotyledon 'Alba'
Bitter Root (Code: 5137)

Sparkling pure white flowers grace this succulent-leaved alpine for rockery or trough garden. It prefers partial sun and fast drainage. (10" x 18") Zn6.

Lewisia cotyledon 'Regenbogen'
Bitter Root (Code: 5264)

Succulent rosettes are topped by clusters of rainbow-hued flowers in late spring and early summer. This choice alpine requires excellent drainage. (10" x 36") Zn4.

Lewisia cotyledon 'Sunset Strain'
Bitter Root (Code: 5621)

Blooms glow in marvelous shades of pink, orange, and yellow. The succulent leaves form an evergreen rosette. This alpine charmer is perfect for containers as well as the garden. (10" x 18") Zn4.

Lewisia x cotyledon 'Little Plum'
Bitter Root (Code: 4480)

Intensely rose-purple flowers have the slightest orange highlights. Blooms appear in late spring and often again in fall. A choice rockery selection. (6" x 12") Zn5.

Lilium washingtonianum
Washington Lily (Code: 7649)

Fragrant, trumpet-shaped pink flowers appear on tall stems, up to 20 per stem in summer. The flowers have red spots that fade to dark pink. Plant in the woodland garden. May need staking to keep the stems upright. Pacific Northwest native. (48-72" x 6-24") Zn6.

**Lonicera involucrata***Black Twinberry* (Code: 7268)

Pairs of small, yellow, pendulous, tubular flowers are surrounded by green bracts in late spring and summer. After the flowers fade, pairs of showy black berries form, each surrounded by the bracts that have now turned bright red. The flowers of this handsome shrub are enjoyed by hummingbirds, while other birds and wildlife will eat the berries. A Pacific Northwest native.

(8'-10' x 6-8') Zn4.

**Mahonia aquifolium***Oregon Grape* (Code: 6965)

This Pacific Northwest shrub is known for its bold-textured, evergreen, holly-like leaves that turn deep burgundy in winter. New leaves emerge reddish in spring when the yellow flowers appear. Blue berries appear in late summer and fall. (3-5' x 3-5') Zn5.

**Mahonia nervosa***Cascade Oregon Grape Holly* (Code: 7266)

This low-growing NW native evergreen shrub spreads by rhizomes to form thickets. The evergreen leaflets have toothed edges and resemble holly foliage. Fragrant pale yellow flowers bloom in spring followed by blue berries in summer and fall. (18-24' x 2-4') Zn5.

**Mahonia repens***Creeping Oregon Grape* (Code: 6963)

Compound evergreen leaves look similar to holly. It forms a low-spreading groundcover with fragrant, small, yellow flowers that bloom from mid spring to early summer at the branch tips. This NW native is an excellent choice for dry shade. (12" x 30-36") Zn5.

**Maianthemum canadense***May Lily* (Code: 6348)

In spring, creamy-white flowers adorn this pretty spreading, native North American groundcover, followed by small red berries in summer. Easy to grow and useful for colonizing shady places. (12" x 24") Zn4.

**Mimulus cardinalis***Scarlet Monkey Flower* (Code: 3115)

Scarlet-orange, snapdragon-like flowers have yellow throats. This Pacific Northwest native is loved by hummingbirds and blooms all summer. Performs best in part shade with moist soil. (14" x 24") Zn6.

**Oxalis oregana***Redwood Sorrel* (Code: 5473)

This charming NW native shamrock features simple white flowers in spring and summer. A sweet addition for the woodland garden, it will spread to form an excellent groundcover. (7" x 30") Zn3.

**Penstemon procerus var. brachanthus***Pincushion Penstemon* (Code: 7711)

This charming, mat-forming Penstemon has spikes of small purple flowers to 10" tall in late spring. Native from northern California through Oregon. (3-10" x 18-24") Zn6.

**Polypodium glycyrrhiza***Licorice Fern* (Code: 7653)

This Northwest native fern commonly grows on tree branches or on rocks in the coastal forests. The rhizomes have a sweet, licorice flavor. The fronds are evergreen in winter and dormant in summer. (6-18" x 18-36") Zn6.

**Polystichum munitum***Sword Fern* (Code: 7422)

Dramatic, upright fronds reach up to 4' tall! This evergreen NW native fern is a fabulous shade garden accent. A "Great Plant Pick" for the Pacific Northwest! (2-4' x 2-4') Zn5.

**Sambucus nigra ssp. caerulea***Blue Elderberry* (Code: 7239)

NW native deciduous shrub with pinnate compound leaves and creamy-white, flat-topped flowers 6" in width that bloom from late spring to early summer. Dark blue berries follow in summer and fall and are often made into jams. (12-20' x 8-12') Zn4.

**Sambucus racemosa***Red Elderberry* (Code: 7240)

NW native deciduous shrub with pinnately compound leaves. Clusters of tiny white flowers bloom from early spring to mid summer, followed by showy, bright red (sometimes yellow or white) berries. The fruits are inedible, but good for wildlife. (10' x 8-12') Zn4.

**Sedum 'Silver Moon'***Stonecrop* (Code: 3462)

A NW native hybrid between *S. laxum* and *S. spathulifolium* was discovered by the late Helen Payne. Interesting chartreuse-silver, evergreen rosettes are marked with pink and red tones. (4" x 12") Zn6.

**Sedum laxum***Stonecrop* (Code: 3476)

Blue-green evergreen rosettes of 3/4" spatulate leaves are topped with light yellow flowers in late summer. An excellent NW native plant for the rockery, it should be planted more often! (4-6" x 12") Zn6.

**Sedum oreganum***Oregon Stonecrop* (Code: 3499)

Rosettes of smooth evergreen leaves are periodically tinged with pink. Yellow flowers appear in summer. Excellent spreading NW native groundcover for the rockery or container. (2-3" x 12") Zn5.

**Sedum spathulifolium 'Cape Blanco'***Stonecrop* (Code: 3484)

Tight rosettes of evergreen, succulent leaves are covered with a dense silvery-white coating, causing the entire plant to look very white. This attractive and unusual NW native is named after Cape Blanco, Oregon. (4" x 24") Zn6.

**Sedum spathulifolium 'Carnea'***Broadleaf Stonecrop* (Code: 4895)

Compact evergreen NW native succulent with silvery rosettes edged with red to vermillion. The foliage turns deep crimson in winter. Yellow, star-like flowers appear in summer. (1 1/2" x 1 1/2" (4" x 12") Zn5.

**Sedum spathulifolium 'Purpureum'***Stonecrop* (Code: 3485)

Eye-catching silvery-blue & reddish-purple leaves age to burgundy on this clump-forming NW native succulent. Yellow flowers appear in June. It creates a dramatic, spreading evergreen groundcover. (4" x 12-18") Zn6.

**Sisyrinchium bellum***Western Blue-eyed Grass* (Code: 3555)

Violet-purple flowers with yellow centers arise above thin, iris-like foliage in spring. It requires well-drained soil. Native to the Pacific Northwest. (1 1/2" x 1 1/2" (7-16" x 12-16") Zn8.

**Sisyrinchium californicum 'Yellow Stone'***Golden Blue-eyed Grass* (Code: 5585)

This easy-care West Coast native has grass-like leaves and yellow star-like flowers in summer. Thrives in poor soil and stays neat and compact. (5-6" x 6") Zn7.

**Smilacina racemosa***False Solomon's Seal* (Code: 5650)

Clusters of white flowers at the ends of arching stalks distinguishes this plant from the "true" Solomon's seal. Red berries follow the flowers later in the season. It will spread to form a colony. A "Great Plant Pick" for the Pacific Northwest! (36" x 12") Zn3.

**Smilacina stellata***Star-Flowered False Solomon Seal* (Code: 6541)

Northwest native false Solomon's seal with zigzag stems that spread to form a small colony. White star-shaped flowers appear in spring followed by greenish berries that eventually turn black. (1 1/2" x 1 1/2" (24" x 48") Zn3.

**Thuja plicata***Western Red Cedar* (Code: 7238)

Tall, NW native conifer with tiny scale-like leaves arranged in flattened sprays. Small seed cones face upward on the branches. The wood is rot resistant. It prefers moist, well-drained soil. (50' x 20') Zn5.

**Vancouveria hexandra***Inside-Out Flower* (Code: 6200)

Panicles of white flowers with reflexed petals make it appear inside-out. Dainty, compound deciduous leaves are light green on top and glaucous blue underneath. Native to the Pacific Northwest. (16" x 16") Zn5.
