

## Mediterranean Gardens

Mediterranean areas tend to have hot, dry summers and moist, cool winters. Sound familiar? The style is perfect here in our Pacific Northwest climate. Many of our favorite plants are from the areas around the Mediterranean Sea and they thrive here as well. Imagine Tuscan Villas with Rosemary trailing down burnt sienna walls and graveled paths flanked by exotic herbs and gently swaying grasses... Yes, you can create that sort of garden here and here are some plants to get you started...
