Herbal Gardens

Herb gardens are therapeutic, attractive and edible! Our large array of useful and aromatic herbs are well-loved. Herbs can be considered medicinal, culinary, or decorative and sometimes a single variety can be all three! Herbal folklore is prolific and fun to ponder. Plant in mixed containers or straight in the ground to enjoy them all year-round! This list contains plants that may be ingested or used topically. It is advisable to research herbs before experimenting with the use of medicinal herbs and teas.

Artemisia absinthium 'Lambrook Silver'

Turnera 'Diffusa'

Monarda 'Petite Red'

ANNUALS & TENDER PERENNIALS

Calendula officinalis	☀️ ☀️ ☀️	p78
